CPC506

Best solutions to fit your demands!

CPCI 3U 8HP CPU Module

http://www.fastwel.com

- Intel Core 2 Duo and Core 2 Solo processors (up to 2.2 GHz, 533 or 800 MHz FSB)
- Up to 4 GB soldered DDR2 SDRAM
- VGA graphics, resolution up to 2048x1536
- Dual DVI-D interface, up to 1600x1200 (8HP and 12HP versions)
- Intermodule communication (PICMG 2.30): 32-bit PCI bus, 4 x1 PCI Express, 2 SATA II, 4 USB 2.0
- Two Gigabit Ethernet ports switchable between front panel and backplane
- Soldered 4 GB NAND Flash with IDE interface
- SD card slot with USB 2.0 interface
- Increased heatsink versions for passive cooling
- MIC584 mezzanine module: 1 SATA II, 6 RS-232/485, 2 USB, PS/2
- Protective coating (optional)
- Operating temperature range: -40...+85°C or 0...+70°C
- Linux, QNX, and Windows XP Embedded support
Overview

CPC506 is a PICMG 2.30 “CompactPCI Plus” compliant 3U module based on Intel Core 2 Duo CPUs (from long term manufacturing program) operating at up to 2.2 GHz with 4 MB level 2 cache, featuring 800 MHz system bus and 965GME/ICH8M chipset. The processor executes up to 8 floating point operations per clock cycle and can address up to 4 GB of soldered DDR2 system memory in 64-bit mode.

An increased heatsink for CPU and chipset cooling allows efficient heat dissipation within wide ambient air temperature range.

CPC506 is PICMG 2.30 “CompactPCI Plus” compliant and allows to use 32-bit PCI bus together with intermodule communication for high-speed data exchange: two Gigabit Ethernet channels, four x1 PCI Express lanes, 4 USB channels.

The graphics controller of Intel 965GME supports output of two independent video streams to two DVI-D interfaces (8HP modification) or to standard VGA interface.

The firmware of CPC506 supports booting from LAN, from SD cards, from soldered 4 GB flash memory disk, or HDDs, installed on CompactPCI Plus carrier (KIC550) with SATA support, or from drives located on MIC584 mezzanine module.

The MIC584 mezzanine module supports SATA II interface with option to mount 1.8" SATA disk drive, SATA DOM solid-state modules and also offers six COM ports, two USB 2.0, PS/2 and audio interfaces.

CPC506 supports Linux, QNX and Windows XP Embedded operating systems.

Technical Specifications

System
- CPU:
  - Intel Celeron ULV 573, 1.0 GHz, 512 KB L2 cache, 533 MHz FSB
  - Intel Core 2 Duo L7500 1.6 GHz, 4 MB L2 cache, 800 MHz FSB
  - Intel Core 2 Duo T7500 2.2 GHz, 4 MB L2 cache, 800 MHz FSB
- Chipset: Intel GMCH 82965GME+ICH8M
- Soldered Dual Channel DDR II SDRAM up to 4096 MB
- CMOS+SFRAM for configuration parameters storage
- FRAM: 31 KB memory available to user
- Watchdog timer: programmable timeout period; NMI, IRQ, or Reset signals generation
- MTBF: 100 000 hours

Flash BIOS
- SPI interface, 8 Mbit
- In-system modification

Graphics
- 2D accelerator
- Up to 384 MB memory shared with system
- VGA monitor support, resolution up to 2048x1536, 32 bit at 75 Hz
- 2xDVI-D interfaces*, video output switchable from front panel to RIO
- External video adapter PCI-E x16 support

Storage
- Secure Digital card socket
- Flash disk: up to 4 GB soldered with IDE interface
- SATA interface: 3 ports (via backplane, PICMG 2.30), SATA and SATA II support
- Ethernet: two PCI-E Gigabit Ethernet controllers, 10/100/1000 Mb/s, front panel/J2 socket
- USB: 1.1, 2.0 support, up to eight devices connection
- Serial ports: 6 ports available via MIC584 module through LPC Interface
- Parallel port: IEEE1394, ECP/EPP/SPP support (via MIC584)
- HD (high definition) audio: available via a mezzanine MIC584; Line In/Out, Telephone Out, Microphone In
- PS/2 port for connecting KB and mouse via mezzanine module MIC584
- Real-time clock (RTC): batteryless operation capability (without RTC)
- Self-control and monitoring system
- LED indicators
- Programmable ejector switch

Mechanical
- Dimensions: 130.4x212.5 mm (5.1”x8.4”), height:
  - CPC506-01/-02 with R1 - 4 HP, with R2 - 8 HP
  - CPC506-03/-04 (with MIC584) with R1 - 8 HP, with R2 – 12 HP
- Weight:
  - CPC506-01/-02 with R1 - 0.400 kg
  - CPC506-03/-04 (with MIC584) with R2 – 0.650 kg

Power Supply Options
- +5 V ±5% and +3.3 V ±5% from CompactPCI connector

Environmental Conditions
- Operating temperature: –40°C to +85°C - Industrial
  - 0°C to +70°C - Commercial
- Storage temperature range: -55°C to +85°C
- Humidity: 0% to 80%, non-condensing
- Shocks/vibration: 50G/5G

Warranty
- 3 years for parts and labor

Features
- Intel Core 2 Duo and Core 2 Solo processors (up to 2.2 GHz, 533 or 800 MHz FSB)
- Up to 4 GB soldered DDR2 SDRAM
- VGA graphics, resolution up to 2048x1536
- Dual DVI-D interface, up to 1600x1200 (8HP and 12HP versions)
- Intermodule communication (PICMG 2.30): 32-bit PCI bus, 4 x1 PCI Express, 2 SATA II, 4 USB 2.0
- Two Gigabit Ethernet ports switchable between front panel and backplane
- Soldered 4 GB NAND Flash with IDE interface
- SD card slot with USB 2.0 interface
- Increased heatsink versions for passive cooling
- MIC584 mezzanine module: 1 SATA II, 6 RS-232/485, 2 USB, PS/2
- Protective coating (optional)
- Operating temperature range: –40°…+85°C or 0°…+70°C
- Linux, QNX, and Windows XP Embedded support

Overview

CPC506 is a PICMG 2.30 “CompactPCI Plus” compliant 3U module based on Intel Core 2 Duo CPUs (from long term manufacturing program) operating at up to 2.2 GHz with 4 MB level 2 cache, featuring 800 MHz system bus and 965GME/ICH8M chipset. The processor executes up to 8 floating point operations per clock cycle and can address up to 4 GB of soldered DDR2 system memory in 64-bit mode.

An increased heatsink for CPU and chipset cooling allows efficient heat dissipation within wide ambient air temperature range.

CPC506 is PICMG 2.30 “CompactPCI Plus” compliant and allows to use 32-bit PCI bus together with intermodule communication for high-speed data exchange: two Gigabit Ethernet channels, four x1 PCI Express lanes, 4 USB channels.

The graphics controller of Intel 965GME supports output of two independent video streams to two DVI-D interfaces (8HP modification) or to standard VGA interface.

The firmware of CPC506 supports booting from LAN, from SD cards, from soldered 4 GB flash memory disk, or HDDs, installed on CompactPCI Plus carrier (KIC550) with SATA support, or from drives located on MIC584 mezzanine module.

The MIC584 mezzanine module supports SATA II interface with option to mount 1.8" SATA disk drive, SATA DOM solid-state modules and also offers six COM ports, two USB 2.0, PS/2 and audio interfaces.

CPC506 supports Linux, QNX and Windows XP Embedded operating systems.
Expansion Capabilities

KIC550 Interface Module:
- SATA HDD 2.5" adapter: support for HDDs with SATA and SATA II interfaces; HDD dimensions: 100×70×9.5 mm (2.5’’); HDD power control; Hot swap capability; SGPIO interface support; HDD activity indication
- USB port: passthrough USB port of the processor module; USB 2.0 compliance; overload protection; standard front panel connector
- Ethernet interface (optional): KIC550-01 version only; passthrough Ethernet port of the processor module; 10/100/1000 Base-T with auto-detection (defined by the processor module specifications); standard RJ45 front panel connector
- Microcontroller: 8-bit Atmel ATMega 8-16I; communication with host-controller (SGPIO); power voltage monitoring; Indication control
- Power switch: controlled by μC; P-channel MOSFET
- Additional features: HDD activity and hot swap indicators on the front panel; hot swap switch integrated in the front panel ejector handle
- Does not require forced cooling
- Supported operating systems: Windows XP Embedded; Linux 2.4, 2.6; QNX 4.x, 6.x
- Power: +12 V, +5 V
- Dimensions: 3U (160×100 mm), 4HP

MIC584 Expansion module for CPC506:
- HD audio: Line In/Out, Telephone Out, Microphone In
- Two USB 2.0 ports on front panel
- Parallel port: IEEE1284, ECP/EPP/SPP support
- PS/2 port for connecting KB and mouse
- SATA interface: 2 channels (not used for connecting MIC584 to CPC503), up to two external SATA drives; one channel can be used for connection of 1.8’’ SATA HDD or SSD
- No active cooling required
- MTBF: 700000 hours
- Dimensions: short 3U, 88,3×100 mm (3.48”×3.94”), 4HP (without front panel).

VIM552 Graphics Controller:
- LynxExp SM750 graphics processor: x1 PCI-E 1.1: 16 MB internal 32-bit DDR RAM; external 64-bit DDR RAM interface, up to 64 MB; two independent RGB outputs; the current driver version supports mirroring only; digital 24-bit output used for DVI
- System memory: 64 MB soldered DDR SDRAM at 333 MHz (four 16-bit or two 32-bit chips)
- Video output: VGA, up to 1920×1440 @60 Hz, front panel connector; DVI-I, up to 1920×1200 @60 Hz, single channel mode, front panel connector; optional output to RearIO via CPCI Plus Type B connector: DVI output copy; VGA0 output copy; one I2C (DDC) channel; copied to RearIO by I2C switch if necessary
- PCI-E bus: PCI-Express x1 link according to PlusIO PICMG 2.30 specification; compatibility with PCI-E 1.1 (2.5 Gb/sec)
- SATA interface: angle SATA data and power connector on board; the mode and transfer rate are specified; by a processor module; max current: 1 A (+5V)
- USB port: one USB port available via standard front panel connector; one USB port available via DVI connector (optional)
- Flash BIOS: 512 Kbit SPI-Flash
- Operating temperature range: commercial – 0...+70°C
- OS compatibility: MS DOS 6.22, FDOS 6.22, FreeBSD, Windows XP, XPe, Linux 2.6
- Power: +12V
