TYPE 32 MicroTCA 4U PORTABLE TOWER

**FEATURES**

- 370mm H x 279mm W x 308 mm D
- Ideal for prototyping and demonstrations
- Modular extrusion-based solution
- Accepts various module configurations
- Allows both single and double modules in same chassis
- Pluggable fan tray with removable air filter
- Convenient handle makes it ideal for portability
- Assembled and wired
- Optional locking bars to secure modules in chassis
- Optimized via thermal simulation studies
- Customized versions available

The first of its kind in the industry, the Type 32M MicroTCA Portable Tower features a carrying handle for easy portability. The Type 32M MicroTCA is ideal as a development chassis. Utilizing Elma's modular extrusion-based design, the chassis facilitates a wide range of configurations. It accepts up to 6 single/full size AdvancedMC's or up to 3 double modules, 1 MicroTCA carrier hub (MCH) with 1-4 tongue edge connectors and 1 power module. The divider plates can be configured to allow either single or double modules in each slot, offering a wide range of configurations.

The Type 32M features advanced EMC shielding, scratch-resistant vinyl clad aluminum covers, and power components. Cooling is achieved with 2 x 90 CFM fans. Elma has performed thermal simulations to ensure the optimal performance.

MicroTCA defines a modular backplane architecture designed to support redundant "pods" of AdvancedMC modules. The AdvancedMC modules (AMC0/.1/.2/.3) are front removable mezzanine modules first designed to be used on AdvancedTCA cards. The MicroTCA architecture allows large arrays of AdvancedMC modules to be used in a wide array of applications where a lower cost solution is required than could be achieved by the standard AdvancedTCA architecture. The MicroTCA backplane allows single or redundant virtual carriers to provide power management, platform management and fabric connections to greater numbers of modules than a single physical carrier card could support in a classic ATCA application.

**MicroTCA Cube Backplane**

- According to PICMG MicroTCA.0 Rev. 1.0
- Compression style connectors easily replaceable
- Star cube backplane
  - 6 AdvancedMCs, 1 MCH, 1 power module (all full size)
- 12-layer board
- Direct connections for storage protocols
- Pluggable connector for fan tray
TYPE 32, MicroTCA 4U PORTABLE TOWER

#### 1,2) Num. of AMC Slots
- Examp.: 01 = 1, 10 = 10

#### 3) Module Width
- S = Single Module
- D = Double Module
- Z = Combination
- X = Not installed

#### 4) Module Height (Pitch)
- 3 = Compact (3 HP)
- 4 = Mid-size (4 HP)
- 6 = Full-size (6 HP)
- Z = Combination

#### 5) Fabric Topology
- H = Mesh
- J = Redundant Mesh
- K = Single Star
- L = Dual Star
- N = Non Redundant
- X = Not installed
- Z = Custom

#### 6) Height
- 4 = 4U

#### 7) Width
- 8 = 84T
- 6 = 63T

#### 8) Depth
- 3 = 300mm-399mm

#### 9) Card Orientation
- V = Vertical (Default STD)
- H = Horizontal or custom

#### 10) PSU Input
- C = 90-230VAC (Fixed)
- H = 48VDC plug in
- M = Dual 48VDC plug in
- P = 90-230VAC(2 x HS, N+1)
- X = No PSU
- Y = 24 V Plug in
- Z = Dual 24V plug in

#### 11) PSU Output
- (Note: Not all PSU combinations available)
- 2 = 200-299 watt
- 3 = 300-399 watt
- 4 = 400-499 watt
- 5 = 500-599 watt
- X = Not installed

#### 12) MCH
- S = 1 x Plug in
- D = 2 x Plug in
- X = Not installed

#### 13) JSM
- Y = Installed
- X = Not installed

#### 13) Cooling
- P = Push cooling
- R = Redundant Push-Pull
- X = Not installed

---

* Note 1: 1x MCH supports 12 AMC slots
** Note 2: All slot counts are based on total number of available AMC slots (single, double or single stacked).
