XPand3200 Series

Sub-½ ATR, Conduction-Cooled Systems supporting Conduction-Cooled Modules

- ½ ATR compliant, conduction-cooled chassis (reduced height and length)
- Physical dimensions of 4.88 in. (W), 5.62 in. (H), 8.75 in. (L)
- 3U VPX and cPCI backplanes available
- Five conduction-cooled 3U VPX or 3U CompactPCI slots and one power supply slot
- Configurable front panel I/O connectors
- Optional SATA SSD memory module with easy removal and insertion
- Select from an extensive lineup of X-ES designed and manufactured SBC, FPGA, and I/O modules
- Integration services with third-party modules available
- Up to 200 W from a MIL-STD-704 28 VDC or 115 VAC source
- MIL-STD-461 E/F EMI filtering
- Environmentally sealed
- Internal holdup of up to 60 ms at 200 W

XPand3200 Series

The XPand3200 Series redefines the limits of power, performance, and functionality in a sub-½ ATR chassis. XPand3200 Series systems are based on a conduction-cooled, fully ruggedized chassis designed to meet the rigorous standards of MIL-STD-810 while integrating the latest power-saving and performance-enhancing technology. In today's avionics and ruggedized environments, size really does matter, and the XPand3200 sets a new standard for sub-½ ATR computing.

Depending on your processing requirements, XPand3200 Series systems can be populated with high-performance, low-power 3U VPX or cPCI modules designed and manufactured by X-ES. X-ES also has an extensive lineup of XMC and PMC solutions to fulfill your data-processing and I/O requirements. Additionally, X-ES provides integration services for third-party modules.

An optional SATA SSD memory module provides the convenience of removable storage and the ruggedness of solid-state memory at up to 64 GB. An optional front-panel USB port provides system monitoring and maintenance capabilities. X-ES maximizes power supply performance, supporting up to 200 W from a MIL-STD-704 28 VDC or 115 VAC input. Internal EMI filtering and hold-up for up to 60 ms at 200 W are also provided.

### Physical Characteristics
- ½ ATR-compliant, conduction-cooled chassis (reduced height and length)
- 4.88 in. (W), 5.62 in. (H), 8.75 in. (L)

### Backplane Options
- 3U VPX
- 3U cPCI
- Custom backplane solutions available

### Front Panel I/O Options
- USB 2.0- and 1.0-compliant interface
- Three user-defined push buttons
- Removable SATA SSD storage media bay with high-reliability connector
- Custom front panel I/O

### Back Panel I/O Options
- Up to three D38999 circular connectors for I/O
- DVI graphics interfaces
- USB 2.0- and 1.0-compliant interfaces
- 10/100/1000BASE-T Gigabit Ethernet interfaces
- RS-232/422 serial links
- MIL-STD-1553
- ARINC-429
- Custom I/O via XMC/PMC modules
- Custom I/O via third-party modules

### Power Supply Options
- MIL-STD-704 28 VDC input voltage support (default)
- MIL-STD-704 115 VAC input voltage support
- Up to 60 ms internal hold-up time at 200 W
- Up to 110 ms internal hold-up time at 120 W
- Additional power supply options available

---
