XPedite7450

The XPedite7450 is an enhanced, Type 6 COM Express™ module based on the 2nd generation Intel® Core™ i7 processor or 3rd generation Intel® Core™ i7 processor and Intel® QM67 chipset. COM Express provides a standards-based form factor to bring PC processing to a wide range of applications. The XPedite7450 is ideal for the high-bandwidth and processing-intensive requirements of today's commercial, industrial, and military applications. The small footprint and standards-based form factor make the XPedite7450 perfect for portable and rugged environments, while providing an upgrade path for the future.

The XPedite7450 accommodates up to 16 GB of DDR3 ECC SDRAM in two channels to support memory-intensive applications. The XPedite7450 also hosts numerous I/O ports and interfaces, including two dual-mode DisplayPort graphics interfaces, one VGA interface, two x8 PCIe links, one x4 PCIe link, two x1 PCIe links, five SATA/eSATA ports, four USB 2.0 ports, HD audio link, LPC bus, SMB, I²C, and RS-232 serial.

The XPedite7450 uses the latest Unified Extensible Firmware Interface (UEFI) BIOS customized with BIT support. Wind River VxWorks and Linux Board Support Packages (BSPs) are available, as well as Microsoft Windows drivers.
