- Dual- or single-processor SHB or SBC options with the latest multi-core CPUs
- Front access hard disk drive carriers and DVD media bays
- HDD carriers secured with key locks
- Long-life, high-performance and hot-swappable system fans
- Front-panel status LEDs and front-access USB ports
- Rugged and lightweight aluminum chassis
- Additional system configuration options include motherboards

### TRC5002 OVERVIEW:

The Trenton TRC5002 is a shallow-depth, 5U rackmount computer chassis that provides secured front-access to the system's hard disk drives in addition to front-access DVDs and USB ports. This rackmount system is configured as a cluster computer with two PICMG® 1.3 SHBs and a two-segment backplane. Additional configuration options include a single SHB/SBC and various backplane form factors. See [Trenton single board computers](#) or [Trenton backplanes](#) for more details on SBC capabilities and backplane slot configurations.

The TRC5002 rackmount chassis also features a rear access power supplies, individual segment power control and hot swap system fans. The 18" depth of this aluminum chassis is engineered to support industry standard 14-slot, 20-slot and small form factor PICMG backplanes as well as motherboard options including mini-ATX, ATX and SSI-EEB.

Trenton Systems offers complete system integration of a wide variety of standard and customer supplied operating systems and application software packages. Various Microsoft®, Linux and RTOS operating systems can be loaded on to your system by our highly skilled factory technicians. Other system integration services include loading and testing of industry standard or COTS option cards as well as custom designed boards.

Standard industry certifications and approvals for your specific system configuration are also available from Trenton Systems.

Final system weight, environmental specifications and total power consumption estimates are a function of the specific system configuration. Preliminary estimates and final validated values are provided by Trenton for each rackmount computer system we build.
